Education

institute of information technology & management, Janakpuri (GGSIPU)

Information Technology, Bachelor of Computer Applications

8.1/10 CGPA

institute of information technology & management, Janakpuri (GGSIPU)

Information Technology, Masters of Computer Applications

7.6/10 CGPA

Relevant Coursework

- Data Structures
- Software Engineering
- Algorithm development
- SQL
- Computer networking
- Operating system
- OOPS

Experience

Freelance

Feb 2025 - Apr 2025

Full Stack Developer — React, MongoDB, GraphQL, Node Js

Remote

- Designed and deployed a full-stack event management platform with user authentication, event booking, and admin controls.
- Implemented JWT-based authentication and role-based access control, reducing unauthorized access by 25% and improving user experience for 400+ users.
- Integrated responsive UI and optimized API calls, reducing page load times by 30%.

Freelance

Jan 2025 - Feb 2025

Software Developer — Python, Telegram, Gemini

Remote

- Developed an anime-focused Telegram bot with content search and streaming links, increasing user engagement by 50%.
- Integrated Gemini AI for conversational responses and image recognition, enhancing response speed by 30% and improving user retention.

Projects

RSAHANI – Personal Portfolio [Demo](#) | Next.js, Node.js, MongoDB, Redis, Vercel

Jan 2025 – Present

- Created a 3D interactive developer portfolio with Redis caching, cutting data load times by 40%.
- Deployed to Vercel with CI/CD integration, maintaining 99.9% uptime and seamless performance. ([Repo](#))

Flex API – Dynamic Content Management CMS | Next.js, Redis, Socket.io, Redux, Springboot

Apr 2024 - Jul 2024

- Built a scalable CMS featuring AI-powered schema generation, dynamic REST APIs, and JWT authentication.
- Optimized data handling with Redis caching, improving API response times by 35%.

V-Anime – Anime Streaming & Discovery App [Demo](#) | Next.js, Express.js, REST API, MongoDB

Jun 2024 - Jul 2025

- Developed a fast, immersive anime browsing experience with persistent watch progress, quick search, rich metadata pages, and a fluid player interface tuned for uninterrupted viewing. ([Repo](#))

Technical Skills

- **Languages:** C++, C, Java, Python and JavaScript.
- **Development skills:** Next.js, React.js, Express.js, Node.js, Cloudinary, Redux, TailwindCSS.
- **Databases:** MongoDB, SQL, Redis.
- **Tools & Libraries:** Git, GitHub, Visual Studio, Docker, Pandas, NumPy, Matplotlib, YOLOv8, OpenCV.

Achievements

- Secured **1st Place** in **CSS Battle**, (Oct 2023, MATRIX Internware IITM).
- Attained **3rd Place** in **UI / UX Designing**, (Oct 2023, MATRIX Internware IITM).
- Achieved **1st Place** in **ODE TO CODE**, (Mar 2024, Techno Sapiens AIEC).
- Contributed to the **CB Devgun Memorial Asteroid Search Campaign** (Aug 2022, International Astronomical Search Collaboration).
- Achieved **Wipro Java J2EE Certification**, demonstrating proficiency in enterprise level java application development

Soft Skills

- Strong adaptability and analytical problem-solving across varied tech stacks
- Proven ability to deliver under pressure and manage end-to-end development
- Team-oriented mindset with consistent record of on-time, high-quality delivery
