Professional Summary

Frontend and Backend Engineer specializing in Full Stack Development with 2+ years building production web applications using React, Next.js, Node.js, and TypeScript. Currently at Tynari engineering a browser-based design studio — custom SVG engine, text warp pipeline, and a Shopify-style theme builder. Skilled in RESTful API design, microservices, scalability, database optimization, and performance optimization. Comfortable from server architecture to pixel-level canvas rendering.

Technical Skills

Languages: HTML5, CSS3, JavaScript, TypeScript, Java, Python

Backend: Node.js, Express.js, Spring Boot, RESTful API Design, Microservices, WebSockets, Authentication

Frontend: React.js, Next.js, Tailwind CSS, Three.js, Fabric.js, Framer Motion, Single-Page Application (SPA)

Databases: PostgreSQL, MongoDB, MySQL, Redis, Supabase, pgvector, SQL Optimization

DevOps & Infra: Docker, CI/CD, GitHub Actions, Vercel

Tools: Git, Agile, Unit Testing, Integration Testing, Code Review, Debugging, Version Control

Professional Experience

Tynari (formerly Printeast)

Full Stack Developer

Apr 2026 – Present

- Engineered browser-based SVG design studio with component-based architecture and responsive web design (Fabric.js, Next.js) — custom SVG parser, Bezier node editor with DOM manipulation and browser APIs, 7-mode text warp pipeline; **approximately 40% render time reduction** via performance optimization.
- Developed real-time image filter system and pattern designer with non-destructive layer-based editing and cross-browser compatibility integrated into the canvas editor.
- Architected Shopify-style Theme Store — microservices server architecture, database design, theme editing, product management, and one-click publish (Next.js, Node.js).

Triveni Industries – Triveni Pumps Division

Full Stack Developer (Freelance)

Dec 2024 – Jan 2025

- Built scalable e-commerce platform with RESTful API design and microservices architecture (React, TypeScript, Node.js, MongoDB); **35–40% API latency reduction** via Redis caching and SQL optimization.
- Integrated Cashfree payment gateway with secure authentication, JWT session management, and role-based access control; admin dashboard for real-time analytics and inventory.

Projects

RSAHANI – Full Stack Developer Portfolio

rsahani.tech

Tech: Next.js, Node.js, MongoDB, Redis, Three.js, Vercel

- 40% API latency reduction** via Redis caching; 90+ Lighthouse score after web performance and accessibility audit (LCP, TBT, SEO, responsive web design).
- Designed single-page application (SPA) with custom 3D UI using React Three Fiber, GLSL shaders, and component-based architecture.

Flex API – Dynamic CMS Platform

GitHub

Tech: Next.js, Spring Boot, Redis, PostgreSQL

- Headless CMS with AI-powered schema generation, RESTful API design, database design, scalability-first data modeling, and multi-tenant workflows.
- 35% API response time improvement** via Redis caching and SQL optimization on Spring Boot backend.

Pond App – Memory-Based Image Management

GitHub

Tech: React Native, Expo, Node.js, Express, MongoDB

- Mobile single-page application for image memory storage with AI-based metadata handling and reusable component architecture.
- Implemented Keep/Forget revisit flow with local search and secure authentication via JWT session management.

Education

GGSIU – Institute of IT & Management, Janakpuri

MCA, Information Technology (2024) | BCA, Information Technology (2022)

Certifications and Achievements

- Wipro Java J2EE Certification** – Enterprise Application Development (2023)
- 1st Place** among 50+ teams – ODE TO CODE, Techno Sapiens AIEC (Mar 2024)
- 1st Place** – CSS Battle, MATRIX Internware IITM (Oct 2023)
